

When your roof needs real protection

Granular Cap Sheet

Metal

Smooth BUR
Modified Bitumen

Aged Single-Ply

Uniflex® Professional Roof Coating Systems are designed to:

- ✓ **REDUCE** maintenance costs!
- ✓ **REDUCE** energy costs!
- ✓ **ELIMINATE** costly tearoff, disposal and replacement!
- ✓ **PROTECT** original system from aging!

Commitment

Our commitment to the roofing industry spans more than 100 years. Quality products and service beyond expectation have resulted in longevity unequaled in our industry.

Uniflex, the first name in metal roof coating protection, manufactures several high-quality coatings formulated to maximize performance over a variety of roofing substrates.

Let Uniflex show you why they have outlasted and outperformed the competition.

Choose from the leader...

This ongoing commitment to meet your roof maintenance needs includes:

- UL and FM approved systems
- Energy Star Partner
- Extensive warranty coverage
- Experienced technical service
- Approved Contractor Program

Title 24

UNIFLEX®
Industrial Roof Coatings

Coating Systems
For metal roofs

Uniflex was the first to introduce a quality aluminum fibered coating to the metal roof industry in 1946. That product, Uniflex 500, is still in demand as an economical, long-term solution to metal roof corrosion and leaks.

The **Uniflex® Elastomeric Coating System** provides a highly reflective white finish reducing thermal shock, movement, and cooling costs. Outstanding performance utilizing the latest generation 100% acrylic polymer providing long term waterproofing protection.

Coating Systems
For built-up, modified bitumen & granular cap sheets

Uniflex offers several coating options for your built-up or modified bitumen roof to help meet your specific needs and budget. We can help with a basic asphalt emulsion system, aluminum coating or our premium white elastomeric system incorporating our Elastomeric MB BaseCoat that provides outstanding adhesion over asphalt surfaces. The highly reflective white finish provides maximum energy savings and waterproofing protection.

Coating Systems
For single-ply roofs

Uniflex offers elastomeric coating systems that provide outstanding adhesion over weathered single-ply systems. The highly reflective white finish provides maximum solar reflectance, protecting the original system from further aging and degradation. Economical recoating allows the membrane to remain in place, eliminating costly replacement and disposal!

Before Uniflex

After Uniflex

Since 1906, Uniflex® established itself as one of the premier manufacturers of quality coating for roof restoration.
